

APPALACHIAN STATE UNIVERSITY

1980-1981
Admissions
Bulletin

Appalachian

You will find no ivy-covered walls at Appalachian. Appalachian is not content to sit still and let the ivy grow.

Appalachian is a university still in its youth—
curious,
booming,
alive,
and antsy for tomorrow.

Some universities are
old and venerable, almost
from the moment their
cornerstones are laid.
Some universities are born
middle-aged.

Appalachian is young.

Appalachian—since
1899, a special kind of
place for a special kind of
people.

Studies at Appalachian

What is a college education? Hard to answer? Try this one: What is an educated person? Or this one: How does one become educated? Even tougher to answer.

One thing seems clear. Education is certainly not confined to formal schooling. But also clear—or else you wouldn't be planning to come to college—is the belief that formal schooling may add to your understanding of yourself and the world you live in as well as your skills in dealing with yourself and your world.

This is the belief of our faculty and is the basic rationale for the academic programs offered. Directed toward the goal of your education, our undergraduate program is presented in four areas—general education, academic major, electives and professional courses. Ap-

proximately one-third of your work is in general education, another third in your major, and the remaining third in elective or professional courses.

The purpose of general education is to build upon previous schooling to help you become a liberally educated person, while the purpose of a major area of academic concentration is to lead you deeply into at least one area of knowledge. Elective courses permit you to broaden and deepen your academic experience and competence, and professional courses are intended to prepare you for professional job skills.

At Appalachian, you may choose from over 180 majors and concentrations in 34 academic departments.

Student Life

A Voice in Policy

At Appalachian, students have a voice in administration through faculty-student-staff committees. Students serve with their professors on committees for academic policy, admissions, business affairs, public programs, institutional research, public service, registration and calendar, research, student life, and traffic and campus management.

Athletics and Intramural Sports

Sports are a major part of college life and Appalachian offers a wide sampling. Whether as a spectator at varsity events, or as a participant in the 45-sport intramural program, athletics offer something for everyone.

Appalachian sponsors eight varsity sports for women, eleven for men, and one coeducational sport—the largest number for any Southern Conference school and as many as any school in the state.

Women's varsity sports include field hockey, basketball, softball, volleyball, track, swimming, golf and tennis. Men participate in football, cross country, soccer, basketball, wrestling, swimming, track (indoor and outdoor), tennis, baseball and golf. The varsity rifle team is for both men and women.

Appalachian is a member of the National Collegiate Athletics Association (NCAA) and the Association of Intercollegiate Athletics for Women (AIAW).

Appalachian's intramural program offers students some 45 different sports from billiards to river racing, and from skiing to horseshoes. Over half of Appalachian's students participate in at least one of the many intramural sports.

Appalachian's sports facilities are spacious and modern. The Mountaineers hold their home football games, soccer matches and track meets in the 18,000-seat Conrad Stadium. The basketball teams and wrestling team compete in 8,000-seat Varsity Gymnasium. Other facilities include the baseball field, a natatorium, wrestling room, dance studio, gymnastics room, weight room, racquetball

courts, cardiovascular research laboratory and a second basketball court.

Complementary Education

Experience extends from the classroom through Complementary Education. Through internships and management practicums in the Division of Complementary Education, students are given opportunities to gain experience in a variety of business-related positions.

The division also coordinates a variety of co-curricular programs on campus including cultural affairs, black awareness programs, student publications and the Student Government Association.

The division supports a full year of programs and activities which are educationally relevant and closely aligned with academic departments.

In addition to working with the management of complementary education programs, students can participate in fraternities, sororities, and in academic, honor, service and religious groups, and become active members in residence life associations in the residence halls. There are some 100 student organizations and clubs on campus.

Through workshops and seminars, students may participate in programs on study skills, career awareness, and through the "After 6" program in such areas as photography, ceramics, macrame, quilting, and gourmet cooking.

Through a series of performing arts programs, the University provides a calendar of performances by both professional and student groups.

The Farthing Gallery of Art, in the lobby of Farthing Auditorium, schedules a variety of exhibitions including works from the Appalachian National Drawing Competition (an annual event), sculpture, fibers, and photography.

The Office of Minority Student Affairs sponsors a series of educational programs throughout the year to increase an awareness of black culture.

Student Publications. *The Appalachian*, ASU's student newspaper, is published twice a week as a service to keep students informed of campus programs and activities. The yearbook, the *Rhododendron*, is distributed in the spring before final exam week.

The W.H. Plemmons Student Union, is managed by interns from the College of Business and is staffed completely by students. The Union houses the post office, a game room, bowling lanes, theatre, ice cream parlor, and large-screen tv room, as well as meeting rooms for organizations.

Religious life. As a state-owned campus, ASU has no religious affiliation. However, there are church-affiliated organizations which

include the Baptist Student Union, Canterbury Club, Lutheran Student Association, Newman Club, Wesley Foundation, and Westminster Fellowship. Eight churches (Advent Christian, Baptist, Catholic, Church of Christ, Episcopal, Lutheran, Presbyterian, and United Methodist) are within walking distance of the campus.

Services. Students may rent refrigerators for their on-campus rooms through Refrigerator Rentals. Other organizations which provide services to the student body and are managed by students include the Student Printing Service and the Student Portrait Program.

Student Government Association. All undergraduate students at Appalachian are members of the SGA. Within the association is the Student Senate, made up of elected representatives from residence halls and from off campus. The Senate is the legislative authority of the SGA, and through its committee structure, students may explore areas of student welfare and make recommendations to appropriate University officials.

Housing, Food Services, Bookstore

The Auxiliary Services area is the division of Business Affairs at ASU which includes student housing operations, food services, campus bookstore, vending and laundry services.

HOUSING. Appalachian maintains 16 residence halls which provide for some 4,400 students. In addition, the University provides apartment living with the Mountaineer Apartment complex, consisting of 90 apartment units available to both married and single upperclass students.

All freshmen are required to live in University housing with the exception of married students and students living with their parents or guardian.

Within the residence halls, the University offers three lifestyle options. Freshmen may choose either option A or B. Upperclass students may choose any option.

Option A. No in-room visitation by guests of the opposite sex with the exception of eight

open house events that will be scheduled during Fall semester.

Option B. Under this option, students may have guests of the opposite sex in their rooms. Maximum hours are noon until one-half hour before closing each day. At the beginning of the academic year, residents vote to determine hours and frequency.

Option C. Students may have guests of the opposite sex visit in their rooms at their discretion. Residence halls will be locked at the closing hours. Guests will be admitted after the

residence halls are locked for the evening, only if accompanied by the resident they are visiting. Unescorted guests will not be admitted after the closing hour.

Rooms are equipped with basic furniture. Students are expected to supply window coverings, linens, blankets, rugs, pillows and other personal furnishings.

BOOKSTORE. Not only is the bookstore the place to find your textbooks, it also offers sporting goods and a variety of merchandise you'll need for your classroom work.

The bookstore provides a rental system to full-time undergraduate students for all required hardback texts. The book rental fee is part of the general registration fee.

The bookstore also operates the vending service and supervises the University laundry and dry cleaning as well as washers and dryers in the residence halls.

FOOD SERVICES. The food services area operates on a pre-pay basis by which students can control their own meal patterns by spending when, where and as much at a meal as they choose. Mealbooks serve as tokens of the prepaid amount and can be used in all of the food service areas.

All on-campus students are required to select a meal option. Freshmen will select either the high option or the standard option.

Food Options	Cost Per Semester
1. High	\$440
2. Standard	\$340
3. Low	\$240

The areas in which the mealbooks are used are the University Cafeteria, serving a full menu of entrees, salads, vegetables and desserts; the Gold Room, a steak and seafood operation; bake shop; the Bavarian Inn, a fast food operation; and an ice cream parlor.

Degree Programs

Degrees—Undergraduate and Graduate

Bachelor of Arts (BA)
Bachelor of Music (BM)
Bachelor of Science (BS)
Bachelor of Science in Criminal Justice (BSCJ)
Bachelor of Science in Business Administration (BSBA)

Pre-Professional Programs

Transfer usually required at the completion of two years:

Engineering

Nursing

Forestry

Pharmacy

Medical Technology

Transfer usually required after completion of bachelor's degree:

Dentistry

Law

Medicine

Theology

Military Science

Army ROTC is offered to men and women in both two and four year programs.

The Colleges

Appalachian is organized into six colleges: the General College, the College of Arts and Sciences, the College of Business, the College of Fine and Applied Arts, the College of Learning and Human Development, and the College of Continuing Education.

The General College

Entering students, both freshmen and transfers, are in the General College until they meet requirements for moving into an upper-division, degree-granting college. Generally, the requirements for moving into one of these colleges are 60 semester hours credit, a 2.00 grade point average (average grade of C), and the completion of the freshman English requirements. The individual college may have additional requirements for entrance. Note that not all general education requirements have to be met before a student declares a major.

The General College assists students during their first two years through orientation to ASU, maintaining up-to-date academic records for students, and coordinating the Faculty Advising Service. Each semester professors who are members of the Faculty Advising Service are available in the General College to assist freshmen and sophomores.

The General College also offers a series of interdisciplinary courses each semester, bringing a variety of academic disciplines into a discussion of some of the major contemporary issues of our time. The General College highly recommends that the student take at least one interdisciplinary course prior to graduation.

When a student formally declares a major (after the sophomore year) he or she moves from the General College to one of the other colleges. The particular college into which you go is determined by your choice of major. All of the colleges, in addition to offering general education courses, provide students with specialized training for particular professions or for professional or graduate schools.

The College of Arts and Sciences

The College of Arts and Sciences contains a variety of intellectual disciplines through which the students develop their knowledge about themselves and about the world in which they live. These disciplines explore life through the perspectives of the humanities, the natural sciences, the social sciences, and mathematical sciences.

The College of Arts and Sciences consists of the following departments:

- Anthropology
- Biology
- Chemistry
- English
- Foreign Languages
- Geography
- Geology
- History
- Mathematical Sciences
- Philosophy and Religion
- Physics
- Political Science/Criminal Justice

- Psychology
- Sociology

Depending on the program pursued, the graduate of the College of Arts and Sciences earns either the Bachelor of Arts or the Bachelor of Science degree or the Bachelor of Science Criminal Justice degree. In cooperation with the College of Learning and Human Development, the College of Arts and Sciences offers the Bachelor of Science degree with teacher certification in the following areas: biology; chemistry; English; French; history; mathematics; physics; Spanish; science with concentration in biology, chemistry, earth science, or physics; and social science with concentration in anthropology, economics, geography, history, political science/criminal justice, or sociology.

The College of Business

The College of Business trains students to become leaders in the business, industrial, and educational communities. The curricula are designed to develop the analytical skill and decision-making ability of each student; to enhance the student's understanding of economic concepts; to increase knowledge of business and education practices and innovations; and to expand awareness of the role and function of industrial organizations.

The departments in the College of Business are:

- Accounting
- Business Education and Office Administration
- Economics
- Finance, Insurance and Real Estate
- Marketing and Management

The College of Business has a very flexible degree program. Any student, in consultation with an advisor and with the permission of the Dean's Office, can pursue an individually designed major within the BSBA program. The graduate of the College of Business receives

either a Bachelor of Science in Business Administration (BSBA) degree or a Bachelor of Science degree. In addition to the individually designed majors, the BSBA is in: accounting; banking; economics; finance; health care management; information systems; real estate and urban analysis; risk and insurance; management; or marketing. The BS is in business education, distributive education (with teacher certification), or office administration.

The College of Fine and Applied Arts

The College of Fine and Applied Arts helps students to build skills through which to express their own creative ideas or to enhance the physical and mental health of both others and themselves. The courses are designed to expand the students' cultural horizons and to develop their appreciation of ethical and aesthetic values.

The College of Fine and Applied Arts consists of the following departments:

- Art
- Communication Arts
- Health, Physical Education and Recreation

- Home Economics
- Industrial Education and Technology
- Military Science
- Music

The College offers the Bachelor of Arts, the Bachelor of Science, and the Bachelor of Music degrees. In cooperation with the College of Learning and Human Development, it offers the Bachelor of Science degree with teacher certification in art, communication arts, health and physical education, home economics, industrial arts, and music (Bachelor of Music in Music Education).

The College of Learning and Human Development

The College of Learning and Human Development surveys the processes of learning and of learners, as well as the lifelong processes of human development. The College prepares elementary school teachers, secondary teachers, teachers in special subject areas, learning disabilities specialists, media coordinators, reading specialists, special educators, speech pathologists, supervisors, audio visual directors, counselors, teachers of higher education, and administrators for public schools as well as institutions of higher education.

The College of Learning and Human Development is organized into the following departments:

- Administration, Supervision, and Higher Education
- Counselor Education and Research
- Educational Media
- Elementary Education
- Reading Education
- Secondary Education
- Special Education
- Speech Pathology and Audiology

The College of Learning and Human Development offers the Bachelor of Science degree leading to teacher certification in the fields of elementary education (K-3 or 4-9), and

middle/junior high school specialization (6-9). The Bachelor of Science degree with teacher certification (K-12) may be earned in art, health education, library media coordination, physical education, reading education, special education (in mild/moderate handicapping conditions or severe/profound handicapping conditions) and speech pathology and audiology. A Bachelor of Science degree in habilitative science, which is a nonteaching, noncertification program, is offered by the Department of Special Education. The Bachelor of Music degree with K-12 teacher certification is available in music. The Bachelor of Science degree with teacher certification (7-12) may be earned in: biology, business education; chemistry; driver and traffic safety; English; French; history; home economics education; industrial arts; mathematics; physics; Spanish; speech; theatre arts; science (general, or with concentration in biology, chemistry, earth science, or physics); social science with concentration in anthropology, economics, geography, history, political science or sociology.

The College of Learning and Human Development administers programs leading to the Bachelor of Technology degree. These pro-

grams are for graduates of technical institutes and community colleges who desire careers in business, industry or teaching in technical institutes and community colleges.

The College of Continuing Education

Although the College of Continuing Education is not a degree-granting program in the University, it works closely with all other academic departments and divisions of the University in order to better serve the various groups calling upon the University for its services. The College of Continuing Education includes:

- The Office of Summer Sessions
- The Center for Continuing Education
- The Division of Camps and Outdoor Programs which supervises:
 - Camp Broadstone
 - The Office of Environmental Studies
 - The Office of University Camp Programs
 - The Office of Wilderness Experiences
- The Student Internship Program
- The Division of Community Services
- The Appalachian Oral History Project
- The Appalachian Consortium Project

Special Programs

Appalachian provides several programs designed to meet the needs of students who have special intellectual skills or interests.

University Honors

University Honors offers a special opportunity for students who have outstanding abilities and who are eager for intellectual and personal growth. Courses in Honors are taught as seminars in which students and professors discuss readings, exchange ideas and knowledge, debate, and share the results of individual study and research. These courses challenge the able student to examine critically and to develop the ability to analyze the material under study. The student explores a special topic in great depth and becomes acquainted with the research tools and methods for that particular topic.

Honors courses are offered at the freshman, sophomore, junior, and senior levels in four different areas: General Honors, Economics, English, and History. Students are encouraged to participate in more than one area at the same time, although they may wish to choose only one. Participation in the Honors programs is by special invitation only; however, students who have not been invited and believe that they are qualified for participation in one or more of the areas may apply to the directors in the area of interest.

University Honors annually offers competitive four-year scholarships. To apply for a University Honors scholarship, write to the Coordinator of Honors Programs.

For further information about the specific honors programs write to the director of the program in which you are interested:

Director of General Honors
General College

Director of Economics Honors
Department of Economics
Director of English Honors
Department of English

Director of History Honors
Department of History

Preprofessional Programs

Preprofessional programs are designed to prepare a student to enter various professional schools. There are four year programs that lead to a BA or a BS degree from ASU and prepare students to enter law, medical, dental, or theological schools. There are also two year programs that are designed to allow the student to transfer to schools offering programs in: engineering, medical technology, forest resources, nursing, and pharmacy. Consult the General Bulletin for further information about the specific program in which you are interested.

Watauga College

Watauga College is a unique interdisciplinary living/learning college made up of some 300 freshmen and sophomores who fulfill approximately three-fourths of their general education requirements in interdisciplinary courses designed by the students themselves working with selected faculty members. Classes emphasize individual and small-group study approaches. In Watauga, which is located in East Residence Hall, students have the advantages of a small college while still being located on a large campus with its cultural, physical, and recreational advantages. Any freshman or sophomore at ASU is eligible to apply; acceptance is on a first come-first serve basis, with some effort being made to select a cross section of the freshman and sophomore classes. Address requests for application forms and further questions to the Director of Watauga College.

ASU - New York and Washington

Depending on your major, you may have an opportunity to visit Appalachian's living-learning facilities in New York and Washington, D.C. The "Loft" in New York is part of a renovated warehouse in lower Manhattan which serves as a base for student groups visiting studios, art galleries and other cultural attractions.

The Washington campus, or Appalachian House, is part of a renovated apartment building near the Library of Congress. It is a base for students and faculty participating in cultural and educational activities.

Internships

Appalachian recognizes that learning does not have to take place only in the classroom. Appalachian's internship programs are all coordinated with academic programs and are based on the principle of learning by doing, with students studying off-campus as interns in education, government, business and industry.

Students usually work in internships during the junior year.

Independent and Individual Studies

Besides the traditional approaches, Appalachian offers several alternative approaches to higher education for students who want to personalize their study.

You may, for example, design your own courses through Independent Study or take offered courses on your own through Individual Study. In either approach, you will work on your own, getting one-on-one help from your teacher when you want or need it.

The B.A. in General Studies

If one of the established degree programs is not what you're looking for, or if you want to prepare yourself for a specific career, Appalachian invites you to write your own major. With faculty guidance, you can select the courses, research projects and independent studies best suited to your needs.

International Studies

ASU offers various programs of international studies in order to prepare its students for citizenship in an interdependent world. Such programs include the International Economics and Business option within the departments of Economics and Foreign Languages and the Latin American Studies minor. The University also sponsors various study abroad programs (announced by the departments involved in the fall of each year) as well as international events on campus.

Career Opportunities For Appalachian Graduates*

DEPARTMENTS

AREAS IN WHICH GRADUATES MAY GAIN EMPLOYMENT

Accounting	Professional public accounting (CPA); managerial accounting; governmental and non-profit institutions.
Anthropology	Archeological field and laboratory work; legal, social and health services; social impact assessment.
Art	Commercial design, art marketing, education
Biology	Medicine (MD, DDC and DVM preparatory programs), education, National Park Service, environmental protection agencies.
Business Education/ Office Administration	Business teachers, distributive education, office occupations, office manager positions, service occupations
Information Systems	Programmer/analysts, hardware marketing, data processing, management training
Communication Arts	Speech and theater education, children's theater, theater management, public relations, advertising, broadcasting, radio and television
Chemistry	Positions in industry, government, and education
Criminal Justice (see Political Science)	
Economics	Entry level management positions in business; economics and/or research assistant positions in governmental agencies
English	Business, publishing, teaching, journalism, medicine, law, advertising, authorship
Elementary Education	Teachers of grades K-3, 4-9 and Middle/Junior high schools
Educational Media	School librarians
Finance	Banking; commercial credit research; government (local, state, federal)
Foreign Languages	Education, business, industry
Geography	Planning; land use in analysis and assessments; cartographics, regional studies, environmental
Geology	Energy-related fields; engineering-related areas such as dams, highways, nuclear reactors, and materials testing; natural resource study; environmental problems and park service activities
Home Economics	Buyers, retail management, fashion and interior design, research, dietetics, food management
Health, Physical Education and Recreation	Public agencies in health education and recreation; teaching, coaching and athletic training
History	Business, education, government, law, journalism, and applied history (preservation, restoration, archival, museums).

Insurance and Real Estate	Positions with insurance and real estate agencies
Industrial Education and Technology	Industrial arts teaching, vocational technical teaching, general manufacturing and construction (management)
Management and Marketing	Industry, sales, international business, marketing research, self-employment, banking, finance, insurance and real estate
Mathematical Sciences	Computer related positions, statistics, industrial engineering, applied mathematics, teaching, actuarial science
Military Science	Army officers in active duty and Reserve forces; military leadership in college and university ROTC programs
Music	Teaching, performance, work in the music industry (music merchandising)
Philosophy and Religion	Ministry, sales, industry, education, counseling and private business, welfare work
Physics	Industrial and governmental laboratories, engineering related positions, research
Political Science/ Criminal Justice	Law, teaching, journalism, business, positions with public and private interest groups; and federal, state, and local government jobs. Law enforcement, the courts and corrections at the federal, state and local government levels; private security agencies
Psychology	Rehabilitation agencies, juvenile corrections, personnel departments
Reading Education	Title I reading positions, public schools
Secondary Education	Teaching
Special Education	Public school teaching in resource rooms, self-contained classrooms, and consultant classrooms; day care centers, clinics, private schools, and higher education
Speech Pathology and Audiology	Public school teaching, speech and hearing clinics
Sociology	Social services, corrections, federal government positions, personnel work

*The positions listed above are just some of the career opportunities available to graduates. The Office of Career Development and Placement provides information to students about career opportunities and helps them in preparing for, and eventually acquiring positions in their field of interest. The process of providing information to students often begins as early as the freshman year and may extend many years after the student has graduated.

Some of the specific services offered by the Placement Office are:

- **Career Counseling.** Individual and group counseling that may deal with resume writing and matching aptitudes and interests with careers or job market trends.
- **Career Library.** A multitude of current reference materials dealing with the job market.
- **Interview Program.** Representatives from private, governmental, and educational institutions from across the country visit ASU to recruit students for employment.
- **Listing Job Vacancies.** A "detail book" of occupational offerings is available.
- **Credential File and Service.** A credential file is maintained on every ASU graduate and, upon request by the student, will be sent to an employee.

Admissions

Appalachian admits students at the beginning of each academic term. It is strongly recommended that applications be submitted as early as possible. This is particularly true of freshmen since, first, campus housing is limited, and second, freshmen, with few exceptions, are required to live on-campus.

There is a \$10.00 non-refundable processing fee for all applications.

Freshman Students

To be considered for admission as a freshman, one must meet the following requirements:

1. Graduation from an accredited secondary school. (The GED, or equivalency test, under certain conditions, is accepted as evidence of graduation.)
2. Presentation of a satisfactory combination of secondary school grades and Scholastic

Aptitude Test (SAT) score. (An American College Testing Program, ACT, score will be accepted in lieu of the SAT.) It is important to note that neither the secondary grades nor the SAT has an absolute minimum. It is the combination of factors that is important. For example, if secondary grades are high, the test score can be relatively low.

3. Presentation of at least two units of college preparatory mathematics, defined as either two units of algebra or one unit of algebra and one unit of geometry.
4. Presentation of a satisfactory health record—submitted after academic approval.

Transfer Students

1. Students seeking to transfer from other collegiate institutions must furnish an

official transcript from each institution attended. These transcripts must indicate a cumulative 2.0 ("C") average on all course work attempted prior to entering Appalachian.

2. Transfer applicants must be immediately eligible to return to the last institution attended.
3. Each transfer applicant must submit a satisfactory health record after academic approval has been received by applicant.

NOTE: Prospective students who have attended an accredited college, but who have earned less than 30 semester hours or 45 quarter hours of credit, must meet both freshman and transfer admissions requirements.

Four-Year Policy

Appalachian has adopted an admission policy directed toward adults who may or may not meet the University's usual admission requirements. The policy states that an individual who has not been formally enrolled in either secondary or collegiate education for a minimum period of four years will be admitted without regard to normal academic qualifications. It also states that if the applicant did not finish secondary school he/she must have successfully completed the high school equivalency examination (GED). For further information, contact the Office of Admissions.

Expenses

The fees payable each semester are listed below. With the approval of its governing bodies, the University reserves the right to make changes in these fees when circumstances require.

Semester Tuition and Fees

Charges include tuition and fees applied to student welfare and activities, registration, other included fees and for undergraduate students only, textbook rental.

	In-State	Out-of-State
Undergraduate students	\$ 306.75	\$1,166.75
Semester Subsistence charge	710.00	710.00
Total per semester	\$1,016.75	\$1,876.75
Graduate students Per Semester	\$ 299.25	\$1,159.25

The basic subsistence charge for students residing on-campus, includes room (with telephone) and standard board plan. An optional increased meal plan is available at additional cost. Reduced meal plans are available to upperclass students.

Students should expect additional expenses each semester beyond the tuition and fees which may include:

- Additional books and classroom supplies \$ 50.00*
- Personal (dental, clothing, entertainment, etc.) 250.00
- Transportation 100.00

*These prices are estimates and will vary for each student.

Financial Aid

More than half of Appalachian's students receive financial aid. This includes work-study programs, loan programs, and several types of scholarships. Resources available to students through the Office of Student Financial Aid are limited, but financial assistance is within reach of almost every student who can show average academic achievement and definite financial need.

Aid applications for the following academic year should be submitted by March 15. Applications will be considered past that date if aid funds are available. Parents must submit a Financial Aid Form if the student plans to apply for a National Direct Loan, College Work-Study, or a Supplemental Educational Opportunity Grant. Forms are available at your high school. The Financial Aid Form should be submitted to the College Scholarship Service, Box 2700, Princeton, New Jersey, 08540.

Types of Aid

Basic Educational Opportunity Grants. This program is available to undergraduate students enrolled on at least a half-time basis. You may apply by checking the "yes" box on the need-analysis form which is available at all high schools and post-secondary institutions. There is no fee involved in applying for the BEOG and a student may receive a grant of up to \$1800 per academic year. **A student who wishes to be considered for other federal financial assistance, must apply for this program.** Students are ineligible for a BEOG if they have received an undergraduate degree.

North Carolina Student Incentive Grant. You can initiate your application for this program by correct filing of the need analysis form (the FAF or the FFS). Be sure to designate the NCSIG Program (0742 on FAF, 6666 on FFS), as one of the agencies to receive a copy of your need analysis. Awards are made to legal residents of North Carolina who are enrolled as undergraduates in a post-secondary institution in North Carolina who can demonstrate "substantial financial need."

Supplemental Educational Opportunity Grants. The SEOG recipient must demonstrate exceptional financial need. To award funds from this source, the institution must determine that the recipient would be financially incapable of pursuing a course of study at the institution without the SEOG. Students who qualify may be eligible for a grant up to \$1500 per year.

Student Activity Grants-in-Aid and Special Talent Awards. Several fields of student activity, including dramatics, art, industrial arts, forensics, music, and inter-collegiate athletic teams, have been approved for grants-in-aid and special talent awards. Students who are interested in a special talent award should write to the appropriate department chairperson for information. Athletes should write to the coach of the sport in which they are interested in participating while attending the University.

Scholarships for Honors Students (Available to Incoming Freshmen). A number of scholarships, ranging from \$600 to \$1,000 per year, will be offered to selected incoming freshmen with a predicted grade point average of 3.25 and above. Announcements of awards will be made in early February. Candidates for awards will be judged on academic and creative potential, character, and potential for contribution to society. Interviews of candidates will be scheduled with the selection committee. Inquiries concerning these awards should be addressed to the Director of the General Honors Program, ASU, Boone, North Carolina 28608.

North Carolina Scholarship Fund for Prospective Teachers. This scholarship loan is for capable students who are preparing to teach in public schools of North Carolina and makes available a loan of \$900 a year. Students with good high school or college records may be eligible for a loan for each of four years. One annual loan is automatically cancelled for each year that the student teaches in the public schools in North Carolina. If the student does not teach, the loan must be repaid at four percent interest. For application forms students should write to Room 442, Education Building, State Department of Public Instruction, Raleigh, North Carolina 27611.

Regular Academic Scholarships. A number of academic scholarships ranging in amounts up to \$500 are offered each year. An ASU financial aid application is required to apply for this award. Should a student have high academic merit plus financial need, he/she may be considered for a larger scholarship. A need analysis is not required in applications for scholarships based on academic merit only; but is required for consideration based on financial need. Scholarships are renewable by submitting a new application and meeting the required standards for such scholarships.

Guaranteed Loan Program (Out-of-State Students Only). This program provides for loans to be made through local banks with the interest to be paid by the Federal Government. Out-of-state students should inquire at their local banks for information and applications relating to this program.

College Foundation, Inc. Applicant must be a *bona fide* resident of North Carolina to be eligible for a loan from this source. College Foundation is the central lender for the guaranteed student loan program in North Carolina. Maximum annual amounts are as follows: one-half the cost of education for freshmen, \$2,500/year for all other undergraduates, \$5,000/year for graduate students. The annual maximum includes summer loans. The aggregate total for graduate and undergraduate study is \$15,000.

The Federal Government will pay the 7 percent interest during the in-school period and 9 months grace period. The borrower begins repayment including the full 7 percent interest rate on the unpaid principal 9 months after termination of his/her education in addition to one-half of one percent insurance premium, which is paid during both in-school and repayment periods.

Information and applications will be mailed upon request, by writing to College Foundation, Inc., 1307 Glenwood Avenue, Raleigh, North Carolina 27605.

The National Direct Student Loan Program. To be eligible for the NDSL a student must be enrolled for at least half-time, be in good standing and must demonstrate financial need under criteria established by the institution. Loan ceilings are \$10,000 in the aggregate for graduate students (including any undergraduate loans), \$5,000 for an undergraduate student, and \$2,500 during the first two years of study. No interest accrues while a student is in college. Repayment, which is to the institution, at three percent interest on the unpaid balance, starts nine mon-

ths after attendance terminates. Borrowers may have as long as ten years to repay National Direct Student Loans. Partial cancellation of the loan may be accomplished by (A) full-time teaching in a public or other non-profit elementary or secondary school which has been designated by the Commissioner as a school with a high enrollment of students from low-income families; (B) full-time teaching of handicapped children who require special education, or (C) by serving as a member of the Armed Forces of the U.S. in an area of hostilities.

University Student Loan Fund. These loans are intended as short-term emergency loans only. They generally mature 30 to 90 days from date of issue and are due and payable in full at that time at 4 percent interest. If one is still in school when the note matures or has other reasons which are acceptable, the note may be renewed by paying the interest up to date.

Vocational Rehabilitation Scholarship. Students who have physical disabilities which constitute vocational handicaps are eligible for scholarships from North Carolina Vocational Rehabilitation, Raleigh, North Carolina.

All undergraduate students applying for any of the above types of aid must also apply for the Basic Education Opportunity Grant.

A Final Word

We don't pretend that Appalachian is the only place to seek a quality education. But we do believe that there is no substitute for education, whether in preparation for a career or education in and of itself as a goal.

We want your decision to come to Appalachian to be your own. We want you to think about that decision before you make it. Appalachian—since 1899, a special kind of place for a special kind of people.
